HELP TEST THE WATER
IN DOWNRIVER CREEKS!

Volunteer this summer to **collect samples from the waterways that flow to the Detroit and Huron rivers and Lake Erie**. Get outside, meet new people, learn about and help protect our home waters, and collect vital information for Michigan's premier volunteer water chemistry and flow monitoring program. No prior experience necessary.

PROGRAM ORIENTATION:

Saturday, March 24, 2018

Time: 1:00 to 2:30 PM

Location: NEW Center, 1100 N Main St, Ann Arbor

This will be an orientation to introduce volunteers to the goals and methods of water quality monitoring in creeks. Topics covered include water sampling, measuring direct water chemistry, estimating stream flow, and program logistics. Hands-on training in field techniques will take place in April during the first weeks of sampling.
